TOKIO (Monday), March 17.—Korean demonstrations continued Saturday and Sunday, according to dispatches. EXTRA SESSION OF CONGRESS
TO BE CONVENED THIS SPRING

(By Associated Press)
WASHINGTON, March 18.—An extra session of congress before June 1st is believed to be a certainty by many government officials and members of congress, although their predictions are without the support of evidence to show that the president has changed his determination not to summon congress before his return from France. Cabinet officers are known to believe that sessions will begin in May, many expecting the date to be about the middle of the month.

NEAR BEER CASE

(By Associated Press)

(By Associated Press)

WINGFIELD BUYS
MORMON GIRLS

Fifteen thousand dollars and 200,000 shares of stock in the company to be organized for development is the price paid James and Thomas Grimes for their holdings in the Mormon Girl group of five claims on the Divide. The buyer was George Wingfield who had the full amount subscribed in less than half an hour while standing in front of the Mizpah hotel. The limit to subscriptions was \$500 and great disappointment was expressed at the fact that no greater amount would be accepted. The deal was closed in a few minutes on the curb and gave the bystanders an illustration of the manner in which the kip operators of Goldfield transacted business during the boom of 1906. The Mormon Girl adjoins the Tonopah Divide.

White Caps leading with 9500 shares, nearly all of which is said to have been local buying. Six thousand shares of Consolidated changed hands. With the exception of Midway, the Tonopah proper stocks were inactive. Small priced Goldfields moved freely.

STILL CROSSCUTTING
ON BROUGHER LEDGE

Before taking his departure for home H. C. Brougher authorized the announcement that the Brougher Divide had cut the big ledge yesterday morning and that last night the face of the crosscut had been extended for a distance of approximately 15 feet. No values were given out as the samples were taken by A. I. D'Arcy, general superintendent of the Wingfield-Brougher properties in the Divide district, to Goldfield for assay and the result would not be ready for publication until some time this afternoon.

There is no doubt about the company having passed the stage of incertitude and that the results are fully in keeping with the hopes of the promoters. A sample of horn silver taken from the ledge was displayed last evening at the Tonopah Banking Corporation which dispels all doubt about the presence of high grade. The specimen was almost pure silver and worth almost coinage value.

THE DIVIDE EX GETS
INTO NICE STRINGER

Divide Ex. may have a shoot of the Tonopah Divide ledge, according to the estimates of engineers based on an assay of \$125 this morning on a sample taken while prospecting in old crosscut. When the company began operations in sinking from the bottom of the old shaft at 150 feet it was decided to do some prospecting in a crosscut extended at that point. The result was a strong stringer carrying the foregoing value. In addition to this the change of formation in the shaft at 165 feet is encouraging. The 150 crosscut will be prospected thoroughly and will be extended to encounter the lode formation. Although sales were posted today at 24c it is significant that local buying orders at 24 placed at 8 o'clock this morning were not filled at noon.

Gus Hansen, superintendent of the Brougher, said he is making about three and a half feet every shot and that four shots had been placed since cutting the big ledge. The crosscut will be continued to determine the width of the ledge which in the upper working showed a space of 80 feet between walls. After this determination it will be time to start a drift along the course of the vein but there will not be any effort on the part of the company to depart from its regular schedule of operations for the sake of making a spectacular showing. The insiders know what they have and there has not been any concealment of the time at which the ore was struck. The only delay was due to the precaution of proving up the orebody instead of claiming a strike at the first shot.

The ledge was cut on the 505 level at a point 200 feet southwest of the shaft. It is well defined with steadily increasing values.
